

Joe Merenda Landscaping Services Inc.

The Corona Virus (COVID-19) has effectively devastated our community as well our country. In so many cases normal everyday living habits have been at best altered, at worst discontinued altogether.

We at **JMLS Inc.** want to assure you that your needed property care and maintenance will continue through our designation as an “Essential” business. All of our services will still be available from Gutter Cleaning, to Landscaping, Lawn Mowing and yes even our Land-Scraping divisions.

Our process of performing estimates will still be functional using this system:

- A call or e-mail, or request via this web site requesting an estimate with detailed needs expressed will be followed up with a return call to set up a convenient time to visit your property.
- During that visit, we will honor Social Distance Regulations. You can remain in your home while we survey the area and determine the needs as prescribed by you. During this time phone contact can be made to refine the needs.
- As soon as can be, following the visit, a detailed estimate with time and costs will be mailed to you for your review.
- This can be finalized via a phone call and receipt of a signed agreement containing the details of our conversations.
- On the day and time agreed to, the work will be done while again, honoring Social Distance Regulations and any needed communications can be handled via phone while on the job.

Other than the maintaining of the “Social Distance” rule, the process is exactly the same as at any other time.

We at **JMLS Inc.** will do our best to make sure your property maintenance needs do not contribute to the stress that has already invaded all our lives. We wish you well and look forward to serving you.
